Skyline Banner Stands – Convenience & Quality

# **Exhibit With Convenience & Ease**

Great for do-it-yourself exhibitors. Banner stands are a popular choice for exhibitors who want convenience and ease. Skyline retractable banner stand displays provide a big graphic look yet are lightweight, cost-effective and durable.

## **Multiple Units Create a Full Display**

Banner stand units can be used individually or positioned to create an inline display that fits within a 10' (3 m) exhibit space. Complement your display with additional Skyline accessories like tables, tablet mounts and more.

### Because of their ease and mobility, banner stands are perfect for many applications like trade shows, special events,

recruiting fairs, lobbies and more.

Ensure brand consistency throughout your organization by making available a fleet of company-approved banner stands. Skyline can provide storage and manage them for you.

## **Tabletops**

Skyline Banner Stand 3000-R and Exalt banner stands create attractive tabletop displays. For added versatility – and with appropriately designed graphics – both systems can be used as either a full height banner stand or as a tabletop display depending on your application.

# **Skyline Innovation and Quality**

What makes Skyline banner stands unique? Innovative features that give you a refined, professional look and the functionality you need to meet your specific objectives. Skyline gives you the best quality display that will last show after show and year after year to proudly represent your valuable brand.

# **Easy Set Up & Transport**

Skyline banner stands set up in minutes and are easy to transport. Aluminum bases are stylish, durable and lightweight.

LED light fixtures highlight graphics and are easy to install, cool to the touch for fast dismantle, energy efficient and very durable.

# E.K.G.

# **Quality and Durability**

When you exhibit, your display is your brand. Look your best with smartly designed hardware with the highest quality graphics to attract attendees and turn them into prospects. All graphics are produced in house by Skyline's experienced team so you get the best fit, finish and look for your valuable brand.

# **Easy to Change Graphics**

Skyline banner stand bases feature the Skyline Graphic Exchange System. This allows you to easily change your panel without investing in new hardware — even on the show floor. Change your graphics to target specific show audiences or to update your look or message.

# **Skyline Banner Stand Systems**

Skyline offers a variety of banner stand systems to fit your specific exhibiting objectives and budget.

### **Exalt® Curved Banner Stand**

The classic curved look in a retractable banner stand! With the simple flick of levers, Exalt transforms from linear to curved. Use as a single banner stand or use three units for use as a backwall in a 10' (3 m) booth space.

# Myriad® Merchandising

Designed with built-in merchandising, Myriad gives you the ease of a banner stand with more flexibility. Acrylic and metal shelves, tablet mounts and literature holders are available to display products and brochures. Each accessory pole supports up to 4 lbs. (8.1 kg). Because Myriad has a fabric center connector panel instead of a base and graphic, it is lighter weight than three-unit banner stand backwalls and more cost effective.

# **Arrive® Display & Workstation**

A full inline display and workstation in one case! The Arrive case transforms into a functional table full of features like a shelf, storage tray and wire management.

Choose either an **Exalt** or **Myriad** display. The Arrive case carries three Exalt units or two Myriad units with a connecting center panel along with all case table components.

# MONARCH

# **Shapes Collection**

The Shapes Collection has a sturdy, double-sided retractable base and layered graphics. The front panel is available in a variety of profiled shapes to give your display and brand a contemporary edge.

# **Banner Stand 3000-R**

Shock-corded support pole and retractable design makes for easy set up. Units can be used alone or designed to be used together for use as a backwall display in a typical 10' (3 m) booth space. 34- and 48-inch (86 / 122 cm) wide units are available.

"Skyline has been an absolute dream to work with, and I don't give out compliments like that easily." – American Airlines

# American

# **Duet® Double Sided Graphic**

Duet gives you graphics on both sides of a single panel for twice the messaging power. Since there is a single base, it is lighter weight and easier to set up. Duet is available in 34- and 48-inch (86 / 122 cm) wide units.

## **Protective Cases**

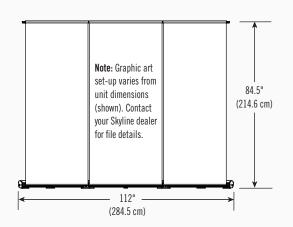

Single banner stand units pack neatly in soft-sided cases with a shoulder carrying strap. Multiple units pack in a hard-sided protective case that has wheels for easy transport.

# **Specifications**
