

Streamlined and Sturdy

Inliten was engineered to effectively support both your products and display your message. Its sleek, streamlined design puts the focus on your brand and products. Sturdy Inliten is designed to support products of all types and weights, flat screens and technology. Inliten components are compatible with other Skyline modular systems to create nearly any look imaginable.

Fabric Graphics

Inliten carries big fabric graphics to support your message. Bold and durable Skyline fabric graphics are produced with the highest quality to best represent your valuable brand.

Layering Adds Interest

Inliten fabric graphics can attach at the back of the frame so profiled graphics, shelves, product or technology stay in the forefront and add depth and interest.

Sturdy Inliten is designed to showcase all kinds of products with a variety of accessories from shelves to special attachments.

Surround your products with powerful graphics that promote your brand.

Private, Semi-Private Meetings

Inliten fabric graphics are available in opaque or sheer, which is great for private or semi-private meetings and presentations.

Big, Brand Presence

Inliten is structural so you can build big. Skyline large-format fabric graphics reduce the amount of seams for a clean brand presentation.

“Modularity also allows us to easily reconfigure the booth as our needs change from show to show.” – Navarti

Merchandising

Inliten is structural to support product with an array of merchandising and presentation accessories including shelving, waterfall brackets, peg bars, monitor mounts and more.

Protective Cases and Crates

Components pack neatly in protective cases, compartmentalized crates that have easy access and wheels for easy transport, or sturdy wooden crates depending on your exhibit design.

Smartly Designed for Impact and Ease

Simple, One-Tool Installation

Inliten's frame components assemble quickly with a simple Allen wrench.

Multi-Unit Pavilions

Inliten is great for multiple units like pavilions. Because fabric can be attached on the front and back of each frame, shared walls can have their own graphic reducing hardware required.

Easy-to-Attach Magnetic Graphics

Inliten's flat-sided steel frame lets you magnetically apply panels, graphics and 3-dimensional accent shapes to attract attention and help you stand out in the crowd.

Many Applications

Attract attention to your message or promotion with big graphics in retail applications and many more spaces.

Available for Rent

Exhibit infrequently? Rent your exhibit hardware and leave future design possibilities open. Inliten components and accessories are available for rent.

Modular Flexibility

For flexibility, modular exhibits reconfigure to fit smaller booth spaces. Excluding the double deck, this island exhibit fits in just 5 containers which reduces exhibit operating costs.
