EXHIBIT SYSTEM

Skyline®

PictureCube® Exhibit System –
Powerful Presence, Lightweight & Flexible

Take Backlighting to a New Dimension

Attract attention with big graphics and backlighting! PictureCube® units feature large fabric graphics and can be backlit for ultimate 'pop.' With 15 models – backwalls, towers, tables and hanging signs – PictureCube carries a powerful presence on its own or as a component of a larger design solution.

Lightweight and Efficient

With fabric graphics and a lightweight aluminum frame, PictureCube exhibits big, yet packs small and installs quickly to reduce shipping, storage and installation costs. All models are easily installed with a simple hex wrench.

Clean, Streamlined Look

PictureCube allows your brand graphics and message to stand out with a frame that is nearly invisible and an exclusive, patented graphic connection system that is hidden beneath the surface for a clean brand presentation.

Powerful and Versatile

PictureCube works seamlessly with other Skyline portable and modular systems so you can attract attention with powerful backlit structures, yet achieve any additional functionality required to make your exhibit work for your specific objectives.

Backlit PictureCube® can be an important component of your overall island exhibit design.

Hanging Signs, Towers, Inlines & Workstations

With a variety of shapes and sizes, PictureCube has many applications from small cubes to 16' (4.9 m) towers. Graphically brilliant and structurally lightweight, they are perfect as hanging structures.

Best Fabric for Backlighting

Skyline's proprietary Performa® Display Fabric is designed for backlighting. Specific thread shape and density promote even light diffusion across the panel surface and reduce graphic hot spots. Durable Performa has great color saturation, is stain resistant and washable.

Intense, Low-Energy Lighting

Compact Fluorescent Lighting provides intense white light with low energy use. Bulbs are small and easily repacked.

Easy to Change Graphics

PictureCube fabric panels are easy to change when it's time to update your look or message.

Workstations That Stand Out

Attract attention with a 23" table, 46" workstation or 69" reception counter. Smooth, solid work surface is available in laminate or Milky Trans Plexiglass. Models are 23" deep, 40" tall and support up to 50 lbs. (22.68 kg).

Custom Rental Solutions

Exhibit rental can be a perfect option for new exhibitors, companies that only exhibit occasionally or companies that change their look often.

All PictureCube units are available for rent and can give you a custom look. Skyline's exhibit – featuring PictureCube – for Milliken & Co. (top) won the Exhibitor Portable/Modular Design Award in the category of Best Island Exhibit Over 600 sq. ft.

"We wanted a structure that looks custom. We wanted something rentable that looks professional." – Milliken & Co.
