

# Structural & Efficient SkyTruss®

Skyline SkyTruss is extremely strong so you can build big and load it up with products or presentation equipment. Unlike other truss products, SkyTruss folds flat to pack smaller and reduce operating costs like shipping, drayage and storage.

## Dynamic Island Exhibits

The flexibility and strength of SkyTruss allows you to create exhibits of any design, size or shape. SkyTruss works seamlessly with other Skyline systems to provide a complete exhibit solution for your specific objectives.

## Heavy-Duty Inline Exhibits

Even in smaller exhibit spaces, SkyTruss can provide a powerful presence along with all the functionality needed to reach your audience. Showcase all kinds of product, integrate flat screens for presentations, or any other needs that require structure.

**“We had the best booth at the show. It was intimidating.”**

— *Monster Daddy*

## Multiple Shapes for Any Design

SkyTruss square and curved components are available in two sizes (11.5” and 5.75” square) and multiple lengths. Compatible connectors – square, curved and angled – allow for nearly any look imaginable.

## Merchandising

Showcasing products, whatever they are, can be important to the success of your show. Design your exhibit to highlight products AND make it easy for staffers to engage, demo and sell.

## Large Structures

SkyTruss is very strong and sturdy which allows you to build big and create a massive brand presence. It is engineered to raise hardware off the floor to open up space for client interaction.

## Brilliant, Large Format Graphics

Create a larger than life brand experience with SkyTruss and Skyline fabric graphics, which are easily installed. SkyTruss has flat surfaces so magnet-attached graphics are also easy to install and change when it's time to update your look or message.

## Structural Truss Folds Flat for Efficiency

SkyTruss modular components fold nearly flat to pack small and reduce exhibit operating costs like shipping, drayage and storage. An 11 1/2" (29.2 cm) square section folds to just 1 3/8" (3.5 cm) deep.

# Functionality to Meet Your Objectives

## Flat Screen Support

Engage and inform. Presentation kiosks feature flat screen support and integral wire management.

## Technology Integration

SkyTruss is sturdy to support all tech needs from large screens to secure computer storage.

## Presentations

Because SkyTruss can span long distances, and can be fitted with large format graphics, it can provide large open areas with impressive large format branded backdrops for presentations.

## Magnet Attached Graphics

Give your marketing message interest and depth by layering sheer and opaque fabric graphics.

## Available for Rent

Exhibit infrequently? Rent your exhibit hardware now and leave future design possibilities open or rent additional components for a larger presence at your major show.

## Modular Flexibility

Modular exhibits efficiently reconfigure to fit smaller booth spaces to give you flexibility and pack small to cut costs. This island exhibit efficiently fits in just five crates.
