## Transaction Table Multi-Talented and Full of Advantages!

Transaction is the exciting new custom modular table system from Skyline. Designed for elegance and engineered for performance, Transaction gives your brand a powerful presence and provides the functionality needed for effective face-to-face marketing. Transaction is customizable with a host of accessories and versatile to fit changing needs.

### A Great Table, a Great Value

Only Transaction offers so much. It has many features and is built with Skyline quality so you know it will last. It's sturdy, yet light weight and is the most compact table of its kind, which keeps shipping costs down. That's value.

### Branded Graphics

Graphics quickly install without tools and are easy to change out when you update your message.

### Customize with Accessories

Easy-to-install accessories include stylish shelves for showcasing product, literature holder and digital screen mount for presentations.

### Perfect for Many Uses

Beyond trade shows, Transaction tables are perfect for corporate lobbies, retail environments, product sampling, even on campus.

A single Transaction table is great for smaller spaces. Two side-by-side units with connecting center panel provide more workspace and storage for larger spaces.

Transaction easily folds and fits into compact shippable case.

Two 9" x 14" inch shelves provide concealed storage with easy access.

Transaction tables complement Skyline portable and structural exhibits.
