

WINDSCAPE®

EXHIBIT SYSTEM

Skyline®

WindScape® Exhibit System
The World's First Air-Powered Exhibit System®

Easier Than You Ever Imagined!

Skyline's revolutionary inflatable exhibit system makes exhibiting easier than ever. WindScape is the lightest weight, easiest to install exhibit system available. All models pack ultra small, have graphics pre-attached and install with simple push of a button.

Unpack: Open case and remove the frame with pre-installed graphic, hose, inflator and battery.

Inflate: Connect hose to inflator and frame. Plug inflator into battery pack or electrical outlet. Press button.

Accessorize: Once fully inflated, the inflator shuts off automatically. Simply install any feet, lights or overlays.

Any Design Imaginable

WindScape is compatible with other Skyline modular systems. You can get virtually any design imaginable with the attribute benefits each system offers.

Single Push Installation

Skyline's inflator runs on electricity or rechargeable battery pack and shuts off automatically when proper inflation has been reached.

Proven Durable Design

WindScape frames have been adapted using technology from sporting and military industries. In all applications, the technology has proven extremely durable and reliable.

Fabric graphics come pre-installed on all WindScape units. Skyline high-definition graphics have intense, saturated color, and are wrinkle-free, durable and easy to change.

Small, Fast, Light

WindScape structures are light weight and install quickly with the push of a button. A 16' (4.9 m) tower weighs less than 42 lbs. (19 kg) and inflates in less than 12 minutes.

An 8' x 14' (2.4 x 4.3 m) oval hanging structure also weighs less than 42 lbs. (19 kg) and inflates in under 15 minutes.

Hanging Structures

WindScape hanging structures pack ultra-small and are light weight for quick rigging. Standard shapes include round, square and trapezoid in a variety of sizes up to 16' (4.9 m).

Impressive Towers

WindScape towers – up to 16' (4.9 m) tall – are a great way to create a big brand experience. Their height and small footprint provide a big look without the costs of overhead rigging.

Custom Shapes

In addition to 46 standard shapes, you can create custom shapes to stand out and complement your brand.

Convenient, Protective Cases

A full 10' (3 m) WindScape unit packs in a carry-on case. Larger units or multiple units pack in a utility case (right) or other available options.

Lower Operating Costs for Island Exhibits

Lighter Weight Has Many Benefits

- Quicker, easier installation reduces installation time and costs
- Reduces the amount of support structure required
- Many shapes can be mounted to exhibit towers to avoid ceiling rigging
- Smaller, lighter packaging saves on shipping, storage and drayage

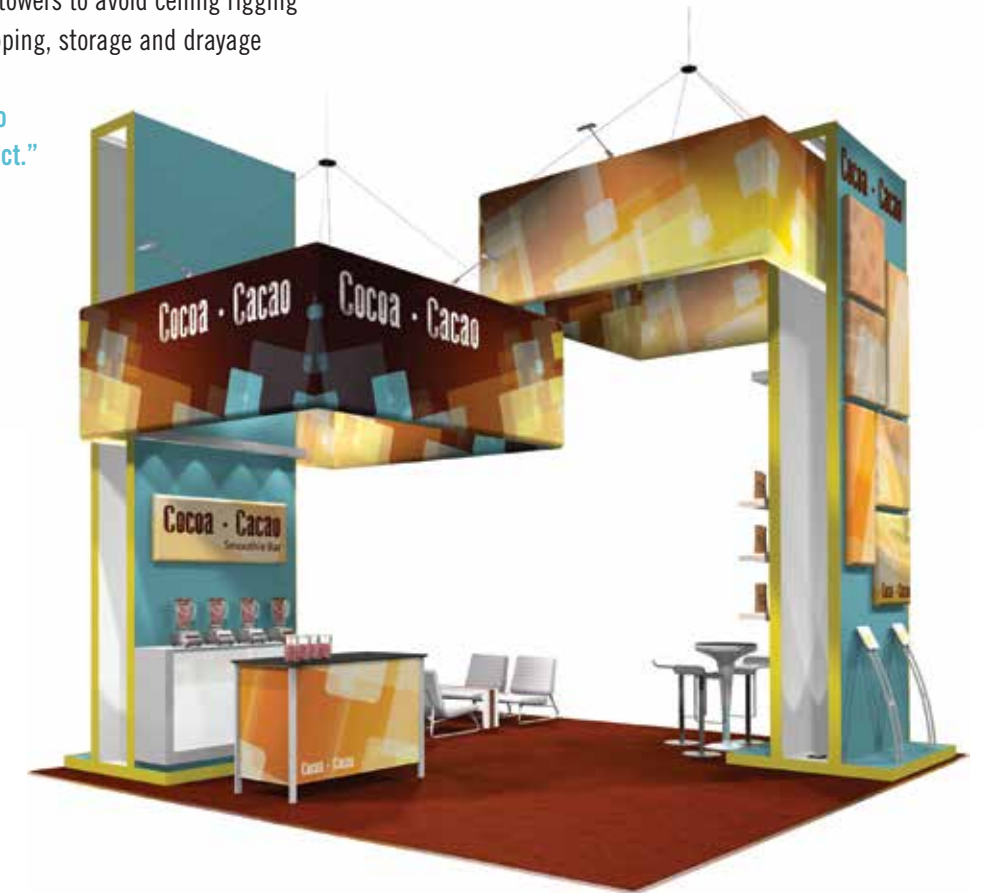

“WindScape saves money from shipping to drayage to labor and I&D. I think it’s perfect.”

– Allianz Global Assistance.

Packs Ultra Small

Excluding furniture, this exhibit, which uses both the WindScape® and Envoy® Systems, packs into two crates and two hard cases.

Reconfigure components to fit varying booth spaces!

Even an entire conference room inflates in minutes with the push of a single button and works on its own or with other WindScape units.

WindScape® is Flexible to Fit Your Objectives

Rear Projection Wall

Build your presentation right into your display! Show video or looping photos and change your message to target specific audiences with short-throw rear projection.

Zipper Door

A zippered door provides convenient access to storage space behind or to the side of your display.

Portable Displays

With their ease of use and transportation, WindScape portable displays can be a perfect solution for your sales force or remote locations as part of a fleet program.

Rental is a Flexible Option

Exhibit rental can be a solution for occasional exhibitors, special events and more. WindScape frames and accessories are available for rent.

46 Standard Shapes

WindScape has 46 standard models from tabletops, back-walls and overlays to conference rooms, towers and hanging structures. Custom shapes are also available.

WindScape units stand alone or integrate with other skyline portable and modular systems.
