

WINDSCAPE®

PORTABLE EXHIBIT SYSTEM

Skyline®

WindScape® Exhibit System
The World's First Air-Powered Exhibit System®

Easier Than You Ever Imagined!

Skyline's revolutionary inflatable exhibit system makes exhibiting easier than ever. WindScape is the lightest weight, easiest to install portable exhibit available. All models pack ultra small, have graphics pre-attached and install with the simple push of a button.

Unpack: Open case and remove the frame with pre-installed graphic, hose, inflator and battery.

Inflate: Connect hose to inflator and frame. Plug inflator into battery pack or electrical outlet. Press button.

Accessorize: Once fully inflated, the inflator shuts off automatically. Simply install any feet, lights or overlays.

Brilliant, Fabric Graphics

Fabric graphics come pre-installed on all WindScape units. Skyline high-definition graphics have intense, saturated color. They are wrinkle-resistant so your brand looks great at all your exhibit marketing events.

Single Push Installation

Skyline's inflator runs on electricity or rechargeable battery pack and shuts off automatically when proper inflation has been reached. A single battery charge will inflate a 10' (3 m) display up to 4 times.

Proven Durable Design

WindScape frames have been adapted using technology from sporting and military industries. In all applications, the technology has proven extremely durable and reliable.

Small, Fast, Light

The WindScape tabletop model along with inflator, battery and hose packs in a backpack and weighs less than 13 lbs. (5.9 kg).

Standard 10' (3 m) units – without overlays or accessories – fit in a carry-on case and weighs less than 36 lbs. (16.3 kg).

Case to 'exhibit ready' in 7 minutes! 10' (3 m) units inflate in under 7 minutes. Tabletops inflate in under 3 minutes.

Graphic Overlays

WindScape inline units can be combined with overlay shapes to create a distinct layered look and give you versatility in messaging.

Rear Projection Backwall

Build your presentation right into your display! Show video or looping photos and change your message to target specific audiences with short-throw rear projection.

Utility Case Conversion

Hide cases by creating a table and counter with stylish graphics. Case conversion kits install quick and easy without tools.

Utility case counter supports up to 100 lbs. (45 kg).

Convenient, Protective Cases

A full 10' (3 m) WindScape unit packs in a carry-on case. Larger units or multiple units pack in a utility case (right) or other available options.

Versatile For Many Applications

With its ease and reliability, WindScape can be a perfect solution for your sales force or remote locations. WindScape provides easy exhibiting for trade shows, recruiting fairs, special events, lobbies and more.

Realize a Quicker Return On Investment

- Reduce shipping costs – or eliminate by carrying on
- Significantly reduce drayage and storage costs
- Reduce or eliminate installation costs

“WindScape saves money from shipping to drayage to labor and I&D. I think it’s perfect.” – Allianz Global Assistance.

Workstation Conversion Kit

WindScape cases – Oval and Utility – can be converted to attractive and functional workstations.

Reconfigure components to fit varying booth spaces!

Even an entire conference room inflates in minutes with the push of a single button and works on its own or with other WindScape units.

WindScape® Tailored to Fit Your Objectives

LED Lights

Lighting helps you get noticed. Our globally accepted CE Certified LED lights have been tested for safety, shipping, durability and brightness.

Stabilizer Feet

The WindScape foot installs with just a sliding motion and adjusts with the simple turn of a knob.

46 Standard Shapes

WindScape has 46 standard models from tabletops, backwalls and overlays to conference rooms, towers and hanging structures. Custom shapes are also available.

WindScape units stand alone or integrate with other Skyline portable and modular systems.

Tablet Mount

Most WindScape backwalls have the ability to accept a Skyline Tablet Mount that fits many iPad® versions. Connection to frame and wires are concealed for a clean look.

Zipper Door

A zippered “door” provides convenient access to storage space behind or to the side of your display (bottom right).

Monitor Mount

Motion graphics and video attract and inform. WindScape’s monitor mount assembles without tools and creates a clean, integrated look. Securely holds a monitor weighing up to 50 lbs. (23 kg).

Rental is a Flexible Option

Exhibit rental can be a solution for occasional exhibitors, special events and more. WindScape frames and accessories are available for rent.
